

Pearl Unified Process Adoption™,

iterative software development process adoption for successful software projects.

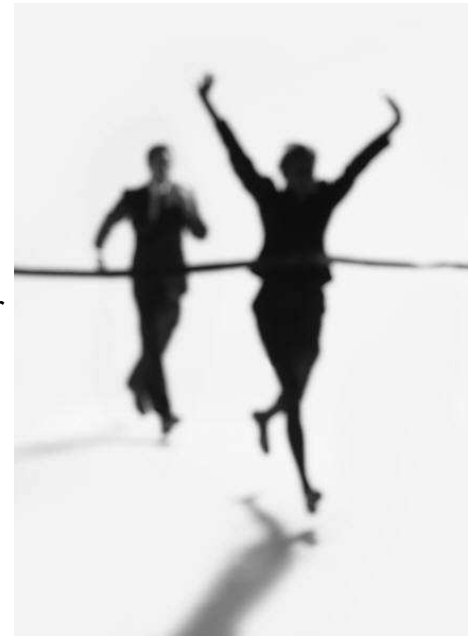

Take the higher ground®

GEM-UP CONSULTING INC.

Software development organizations need a repeatable and efficient methodology to succeed systematically in exceeding their customer's expectations. The Unified Process and its various variations (RUP®, OpenUP...) is the most suitable SDLC and best practices repository for most Independent Software Vendors and custom-made projects.

The Pearl Unified Process Adoption™ is your ideal Consulting service. It will drive the adoption of the Unified Process and deliver the agility and professionalism required by a business-driven, architecture-centric and quality-focuses iterative development process.

Take the higher ground®.

Pearl Unified Process Adoption™

Benefits

- GEM-UP gives impartial assessments and guidance and will uncover broken-processes for the benefits of the organizations.
- GEM-UP can assign the resources you need without creating a productivity dip; business must go on during the adoption of the better SDLC.
- GEM-UP uses a business-driven approach to process creation, our key philosophy is that processes only exist to solve a business problem.

cution of the plan, until the organization is self-sufficient in continuous process improvement.

Approach

- **Awareness and assessment:** First we help the organization create awareness and assess its specific needs.
- **Business Case:** Then we build the business case and develop the adoption goals and opportunities.
- **Plan and Execution:** Last we plan in more details the adoption process and coach the team through the exe-
